Ride through mountain woods to get to a small but charming lake, locally called Chil Gol. On the lakefront, you will enjoy your picnic lunch and then continue your journey towards Sedvi Gorge. The gorge is a favorite resting area for locals due to its natural beauty. On the upper hillside of Sedvi Gorge is located the same-name Sedvi monastery of the 13th century and a watchtower. By crossing the smaller river you will explore the partly survived medieval shrines. Next, ride your steed along Sedvi to Odzun passing by Hagvi hamlet, pasture lands, and farms from where your trails will take you through the cornfields to the basilica-style Holy Virgin church of the early Christian period, located in the center of the village. After visiting the monastery you will be invited to a lunch break in a rural garden. Your return route along the gorge will take you back to the stable.
