Equine Farm Tours Armenia

Lori Canyon Treks Lori Canyon Treks

Our traditional harvest riding tours showcase local farms recreating mid 20th-century rural farming. Take a 3-hour riding experience through cultivated fields over higher tableland rising above Debed Canyon and enjoy with your family or groups harvested crops of the region. Depending on seasonality be part of raspberry, sunflower, and corn harvesting works. It's perfect for a unique experience in the countryside 20 minutes away from Alaverdi town. Along the trails, see a lot of pasture lands and wheat farm demonstrations. The best season for raspberry harvesting is from August to September, sunflower harvesting – is from July to August, and corn harvesting – is from May to June

Price: 13.000 and per person
What is included:
Transportation from Alaverdi, guided tour of the farm, horse riding experience, harvesting experience, tasting raspberries or other corps
What is not included: Transportation from the airport

Special offer!
Pasture-based and small-scale livestock farming systems are the main source of livelihood in the mountain primary sector, ensuring socioeconomic sustainability and biodiversity in rural communities throughout the region and beyond. Lalvar Mountain in the North of the region is a wonderful place to live and for farming businesses. We offer several farming activities like breeding domestic cattle, chasing them from grassland, milking, and producing alpine cheese. Cheese-making is a passion; it also requires a lot of energy and quite simple curiosity. If you are still enthusiastic about livestock farming and ready to live in semi underground mountain lodging, this suggestion is for you. Contact us for more information on mountain farming.
